

Abiodun (Magret) Oyedele

Software Engineer

Canada • belloabiodun17@gmail.com • magret.ca • [GitHub](#) • [LinkedIn](#)

Summary

Software Engineer based in Canada with a strong full-stack background, working across TypeScript, React, and Next.js on the frontend and Node.js on the backend. Enjoys building scalable applications, debugging complex systems, and turning ideas into real products. Recently deepening skills in cloud technologies and exploring how AI can be applied to solve real-world problems. Actively involved in supporting learning programs through TechNest Community.

Technical Skills

Full-stack Development

Building production web applications with JavaScript/TypeScript, React/Next.js, Node.js, and Python.

JavaScript • TypeScript • React • Next.js • Node.js • Python

Cloud & AI

Growing focus on cloud platforms and practical applications of AI to real-world problems.

Docker • CI/CD • AWS • AI-assisted development

Featured Projects

InstaloanX

Featured Project

Full-stack lending platform built with modern web technologies. Case study available on portfolio.

- Designed and developed scalable full-stack application architecture
- Implemented responsive UI with React/Next.js and TypeScript
- Built robust backend services with Node.js

Community & Leadership

TechNest Community

Coordinator

Supporting mentorship and instructor programs, helping others grow in their tech journey.

- Coordinate mentorship and instructor programs
- Support learners in full-stack development and AI topics
- Contribute to community-driven learning initiatives
